

**2nd RICHEN GROUP OPEN COMPETITION
FOR RESEARCH IN THE FIELD OF
HELICOBACTER PYLORI
2022-2023**

Evaluation process

1. The selection of the Research Projects is made by the **Research Grant Panel (RGP)** and is divided into two phases:
 - First selection based on the Project's description by a board coordinated by Richen Europe, which will select the projects for their interest and applicability;
 - A second evaluation of the accepted projects by a scientific committee coordinated by the EHMSG Members, based on their clinical value and potential in the field of research;
 - The scoring metrics will be as follows:
 - Scientific assessment of the project (max. 50 points)
 - Candidate's CV assessment (max. 20 points)
 - Project's applicability (max. 20 points)
 - Candidate's age (under 35 will be advantaged) and background (max. 10 points).
1. The applications can be submitted from 23rd May to 19th August 2022. The results will be announced during the EHMSG Workshop (9 September 2022) and shall be immediately available on the website www.ehmsg.org, where all the Competition's information and details can be found;
2. In total, the jury shall select up to 4 Research Projects. Each Project's Team will be provided with 1 infrared spectrometer for *H. pylori*.
3. The selected candidates will be informed by e-mail about the procedure for the delivery free of charge of the instrument and accessories. A training shall be provided by the Richen Europe team and the instrument will immediately be available for use in the Research Project's scope for all the agreed time of the Research Project's study (10 months);
4. At the end of this period of time (31/07/23), the selected candidates shall return the instrument and accessories to Richen Europe following the instructions that will be sent in due course;
5. Each candidate shall present to the Organizers a presentation/poster (tbc) summarising the content and results of the Research Project's publication, as well as the

bibliography. These presentations/posters shall finally be made available during the XXXVth Workshop in Glasgow 2022, where a final winner's selection shall take place. The winner will be granted:

- **1 equipment** (a new model of the same used during the project's development)
- **and 1 free registration to the XXXVIth EHMSG Workshop** in Antwerp 2023

Terms and Conditions

1. The aim and objectives of each submitted Research Project shall be clearly focused, to allow the project to be evaluated. **All projects must be submitted in English.**
2. The Research Project reports shall mention the information about the Richen Europe instrument and kit used for the study;
3. Richen Europe will discuss with the selected applicants upon the number of kits needed to perform the Research Project. Richen Europe shall provide each selected applicant up to 100 kits free of charge. A further amount of kits shall be provided at a special price specially dedicated to this Open Competition and to be agreed upon before the beginning of the Research Project.
4. With the new rules introduced for inter-personal relations by the COVID-19 pandemic, Richen Europe highly recommends the new Breath Testing protocol of use for patients and clinicians that the EHMSG has recently finalized;
5. In Europe, the use of citric acid for Urea Breath Testing is widespread and recommended, but there is no worldwide consensus yet. In the scope of this Open Competition, specifically for Projects in the area of *Helicobacter pylori*, Richen Europe will provide all participants with kits which include citric acid powder and requests all participants to mention this information in their final report;
